

1. **OPEN** your default web browser (Chrome, Firefox, Safari, etc.).
2. In the address bar type **microsoft.com/edge**

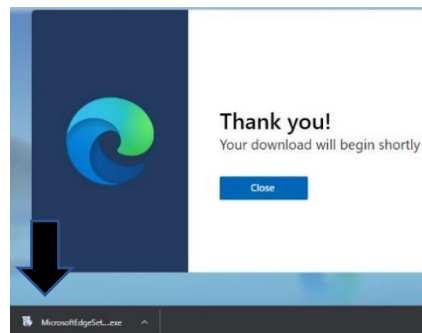

3. Left click the **DOWNLOAD BUTTON**, to download Microsoft Edge on your Windows 10 computer. If you are using another operating system, you will need to click on the carrot \vee to install for other operating systems.

4. Once you click on the download button you will be prompted to read Microsoft's Terms and Conditions. You will need to **ACCEPT** the Terms and Conditions to download and use the software.

5. Once you have accepted the terms, your browser will automatically start downloading the installation program for Microsoft Edge. When the download is complete you need to run the installer by clicking on the file or following the browser's prompts to **RUN THE DOWNLOADED** file.

6. You may receive a pop-up advising you that Microsoft Edge is trying to modify your computer. You must **CLICK YES** to continue with the install. When the software is done installing you will have a few more steps to complete and finish the set-up. For fast set-up, click **GET STARTED** followed by **CONFIRM, CONFIRM**, and **CONTINUE** without signing in... If you would like a more personalized set up, follow the prompt instructions to import and sync browser.
